Add customer modal: states

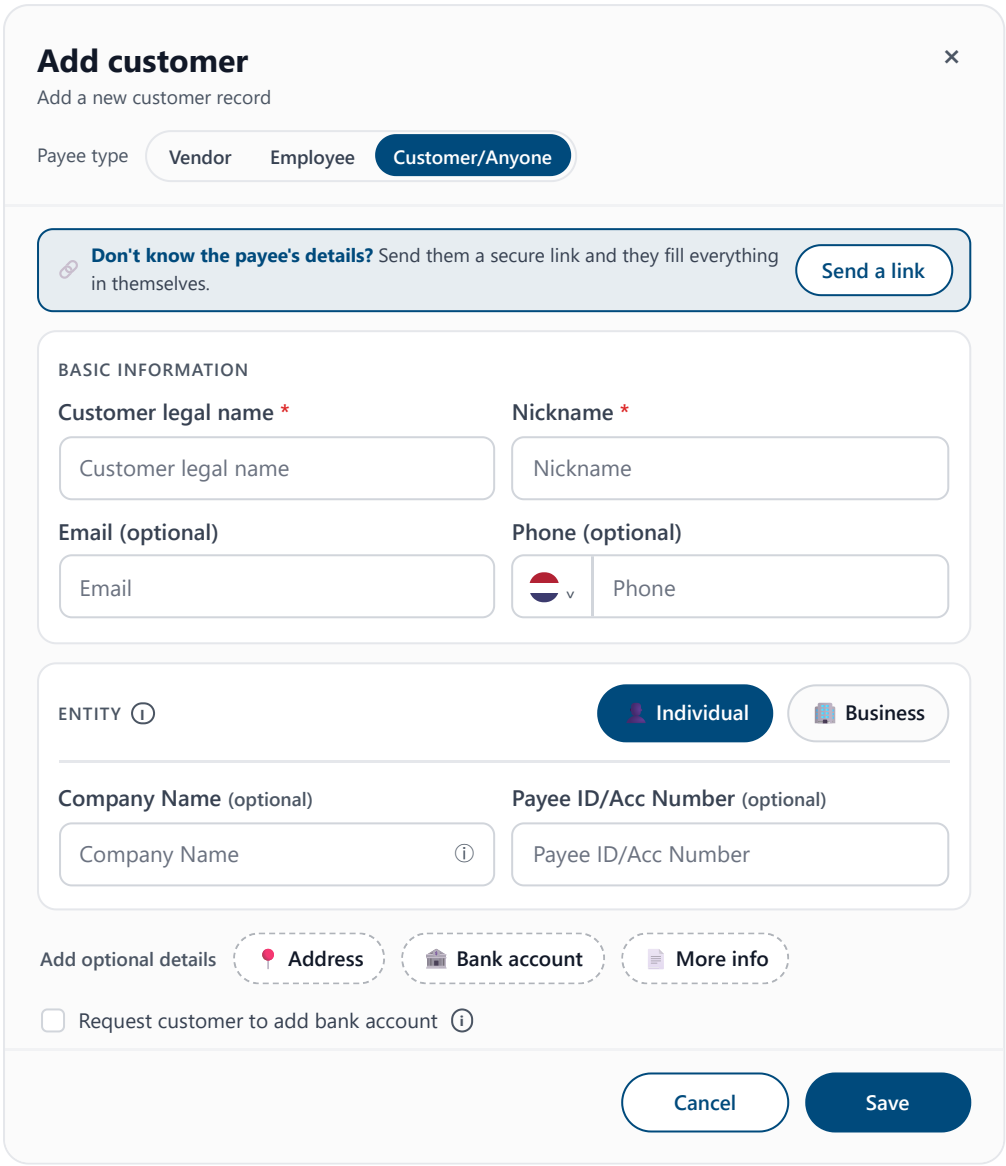

Zil Money / OCW v4, design/zilmoney-rebrand, 14 October 2026.

Field height 40px, field border #d1d5db, 626px modal. One state per page.

1. Individual selected
2. Business selected
3. Individual, Address panel open
4. Bank account panel open
5. More info panel open

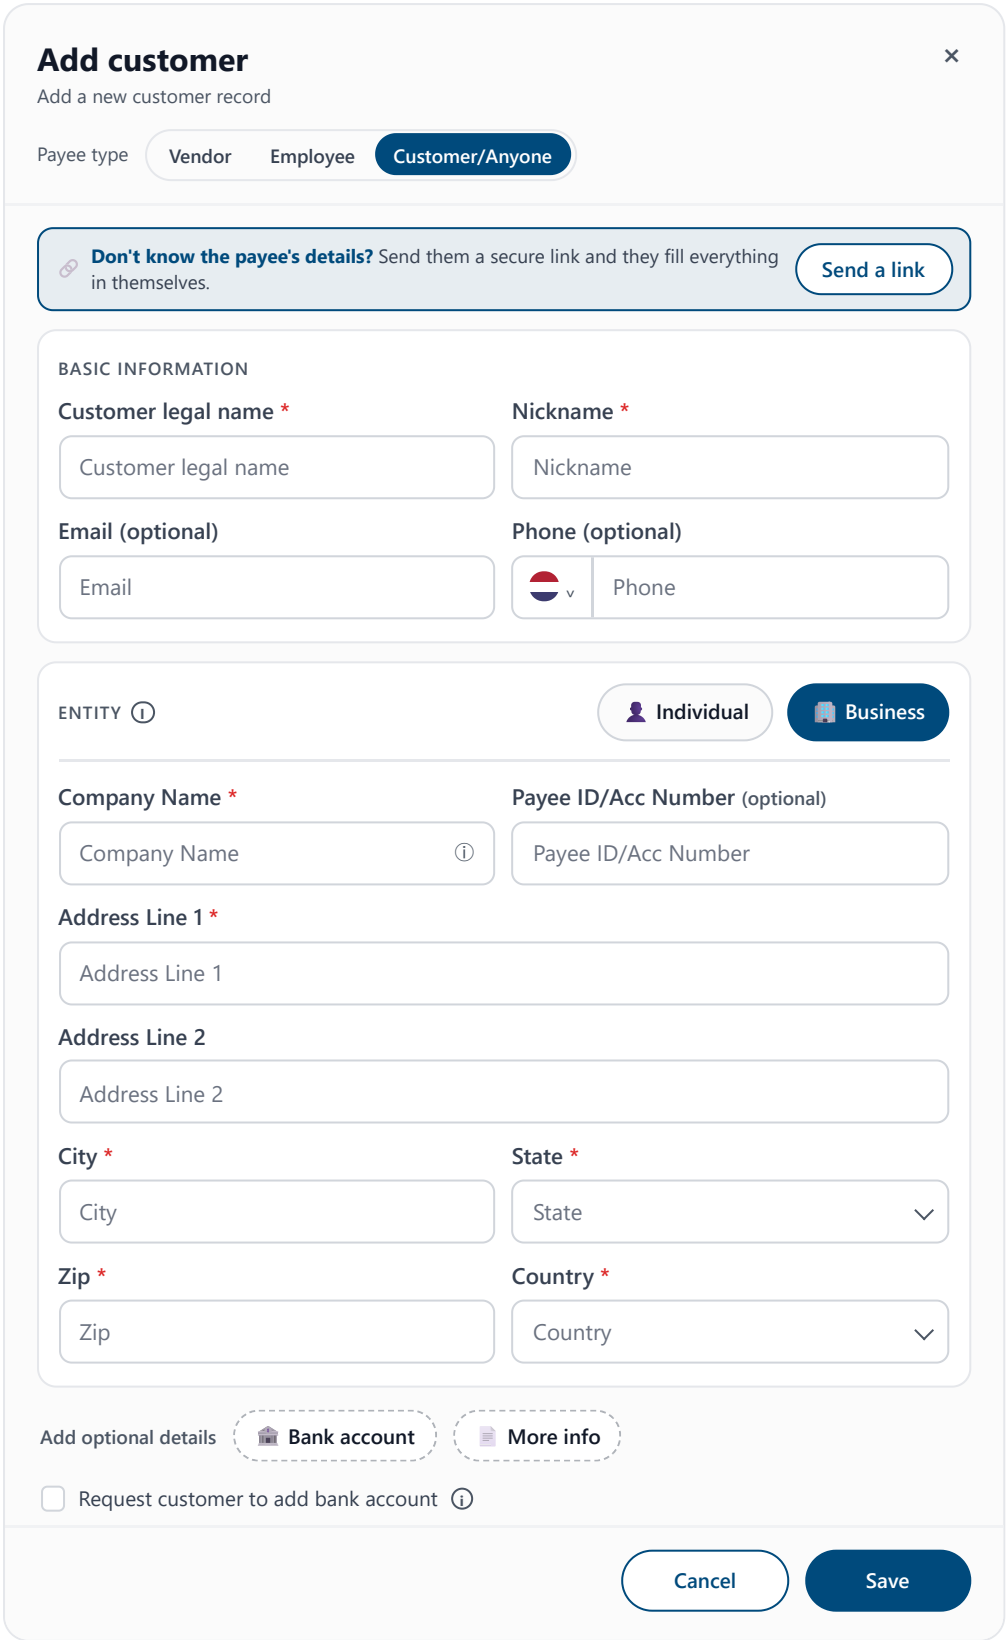

2. Individual selected

Company Name is labelled (optional). Payee ID/Acc Number sits beside it. No subtitle under Entity.

3. Business selected

Address renders inside the Entity card, every part required (State and Country carry the asterisk). The Address chip leaves the optional row.

5. Individual, Address panel open

One optional panel open at a time. Cancel restores the previous values; Add closes the panel and ticks the chip.

Add customer

Add a new customer record

Payee type: Vendor | Employee | Customer/Anyone

Don't know the payee's details? Send them a secure link and they fill everything in themselves. Send a link

7. Bank account panel open

Domestic bank details (international is a tab inside the same panel). Fields at 40px like the rest of the modal.

8. More info panel open

Defaults and record fields. Payee ID/Acc Number no longer lives here; it moved to the Entity card.
